

WESTSIDE DIABETES & ENDOCRINE CLINIC

Beaverton, Oregon Laura Chen, MD - Endocrinology

PREPARING FOR YOUR QUARTERLY VISIT

Please read before your appointment. There is no need to call the office.

1. Bring a record of the last 7 days of meals. A photo log or a written list is fine. We will go over carbohydrates together, so do not leave meals out, even the small ones.
2. Keep carbohydrates steady day to day. Large swings show up in your fasting numbers the next morning. If one day runs high, note what you ate the evening before.
3. Watch sodium, especially meals eaten out. This matters for your blood pressure and heart, not your sugars. Restaurant soups and sauces are the usual culprits.
4. Continue your home fasting checks on your usual mornings and bring the readings.

Your A1C bloodwork should be drawn the week before the visit. Bring nothing else; we will pull the rest from your chart.
